Technical Data Sheet

Product Name:	IPSLIP IP 9286 – Low Friction Coating	
Product Number:	- IP9286-1166 Grey (Sermalon)	
	- IP9286-9003 S/M Black	
	- IP9286 – Red	
	- IP9286-1161 Mouse Grey RAL 7005	
	- IP9286-6500 anti-corrosive primer	
	- IP9286-9000 High Black	
	- IP9286-5000 Blue	
	- IP9286-6002 Green	
	- 40024 Thinners for IP9286 Range	
	Please consult our Sales Department for Product Numbers and availability of other colours.	
Product Description:	A fluoropolymer coating formulated to give excellent low friction and wear resistance. One coat system suitable for use in conditions of high temperature providing good abrasion resistance, flexibility and chemical resistance. Suitable for use on a wide variety of items, including automotove components, bearing surfaces and slides; saw and secateur blades and any areas where medium duty dry film lubrication is required.	
	Available in a range of colours except white and pastels but, including metallics. Used as dirt shed coating on brake disc callipers on a variety of high performance cars including MGF; Caterham; Morgan; Holden. Suitable alternative to Sermalon 1140; Xylan 1010.	
	Can be used over anti corrosive primers, for low temperatures (up to 220°C) use 700-155-003; temperatures over 220°C, either use lpcote IP9183 or IP9286-6500 anti-corrosive non chromate primer (alt to 1083) or IP9310

Technical Data Sheet

Approvals/Specifications:	- ITP SMM 937	
	- PCS 2550 (IP9286-1166 - Safran Landing Systems)	
	- IP9286-6002 – Goodrich Actuation Systems 914-034-043	
Performance:	Designed to provide a firmly adherent abrasion resistant low friction	
	coating. The recommended coating thickness range is 30-500	
	microns dependant upon application.	
	The applied and cured coating provides an excelent level of	
	substrate protection due to its chemical resistant barrier properties.	
	The coating provides an easy clean non-stick coating for surfaces	
	open to local atmospheric conditions or self lubricating properties	
	when employed in an enclosed environment such as oil/gas drilling sensors.	
Components:	Single component material.	
Application:		
Surface Preparation:	Ensure surfaces are clean and free from dust, dirt etc. It is	
	recommended that as a minimum the components to be coated	
	should be solvent or alkali degreased whilst phosphating;	
	chromating or fine shot blasting will increase performance and durability of the coating	
Paint Preparation:	Thinner/Reducer Addition: Thinner – 40024 or Cleaner - 40019	
Application Method:	Apply by spray, conventional or HVLP at supply viscosity. Can be	
	thinned if required with up to 10% 40024 thinner.	
Drying Curing:	Flash off: 15 minutes ambient	
	Pre-Cure: 15-20 minutes @ 70-80°C	
	Full Cure: 60 minutes @ 170°C or	
	30 minutes @ 220°C

Technical Data Sheet

Technical Properties:	Supply Viscosity:	110-130 seconds ISO 4 @ 23 +/- 2ºC		
	Flash Point:	≥21°C; ≤32°C		
	VOC Content:	720 – 800 g/l		
	Colour:	various		
	Pack Size:	1 and 5 Litre		
	Density:	1.13 – 1.19kg/l		
	Gloss:	Gloss Finish		
	Thinner:	S30 Thinner		
	Solvent/Clean Up:	S30 Thinner		
	Catalyst:	N/A		
	Theoretical Coverage:	4 – 5 sq m per litre		
	liquid regulations. Before use, refer to Pro	oduct Safety Data Sheet
