

Coating Systems for Military Vehicles and Equipment

Product Description

A range of low VOC 2-component Primers and Finishes, formulated to comply with the new Def Stan 80-225 paint system, for military vehicles and non-flight equipment.

The system is supplied in a multi-pack, near matt IRR, chemical agent resistant (CARC) and gloss non-IRR, non-aircraft use, low VOC.

Indestructible Paint Ltd

Coating Systems for Military Vehicles and Equipment

Primers:

IPLVPF1 – Type 1, primer for ferrous parts, replacement for Def Stan 80-206

IPLVPNF2 – Type 2, primer for non-ferrous parts. Replacement for Def Stan 80-207 chromate which became illegal due to REACH in January 2019.

IPLVPCAT – Catalyst for IPLVPF1 and IPLVPNF2

Top Coats:

IPLVCARC-2853 – CARC finish, matt 285 NATO green (available in a variety of colours). Replacement for Def Stan 80-208

IPLVTCGL-2850 – Gloss topcoat finish NATO green (available in a variety of colours). Replacement for Def Stan 80-209.

IPLVCARC-CAT – Catalyst for IPLVCARC-2853 and IPLVTCGL-2850

This coating system replaces obsolete Def Stans 80-206, 80-207, 80-208 and 80-209. This system is totally chrome free by removing the toxic hexavalent chrome from the coating system.
