

---

**Product Name:** Epoxy Modified Stoving Finishes; Standard and Low Friction Grades

---

**Product Number:** 36000 Series

---

**Product Description:** High durability one coat stoving finishes, epoxy modified, to give excellent hardness and durability. Give good resistance to chemical solvents.

Ideal for use on: Beer fonts; Architectural Hardware; Electrical Switch Plates; Domestic Appliances; Automotive Underbody Components.

Also available as a low friction coating, modified with synergistic fluoropolymers, to provide excellent low friction and wear resistance. Typically used on metal components where a degree of low friction, dry film lubrication is a requirement.
